

Environmental Policy

Objective

Reduce our impact on the environment from our operations where ever possible.

Statement

It is HazElect's intention to protect the environment by:

- Complying with environmental law and regulations & codes of practice.
- Training/Employee awareness for personnel who may cause significant environmental impact from their line of work.
- Continual improvement and respond to innovative ways of meeting environmental objectives.
- Ensure that goods and services procured, support the environmental policy.
- Pollution prevention including waste reduction, natural resource conservation and reducing energy consumption are taken into consideration of all areas of business activities.
- Prevent contamination of the soil from oil and chemical spillage.
- Refrain from removing trees and other plants, and, travelling on unmarked roads and virgin bush to protect all flora and fauna.
- Integrate environmental considerations into all aspects of the companies activities including, JSA's, Risk Assessments.
- Reduce waste, noise and emissions as a result of our operations.

It is the responsibility for HazElect personnel to familiarise themselves with the environmental policies relevant to the site attended and perform their duties in a manner that does not breach these policies. All spills, leaks and subsequent environmental impacts shall be reported to senior management.

All HazElect personnel, Sub Contractors and their employees shall comply with Site Specific Environmental policies and procedures.

Signed: 

Phillip Lyon
Director
